R E P O R T
OF THE
C O M M I T T E E O F V I S I T O R S ,

Presented at Hilary Sessions for 1873.

To Her Majesty's Justices of the Peace for the County of Wilts, in Quarter Session assembled, December 31st, 1872 :—

In presenting their 22nd Annual Report your Committee notify as follows :—

	MALES.	FEMALES.	TOTAL.
Number of Patients in the Asylum			
January 1st, 1872	... 204	252	456
	M. F. T.		
Admitted for the first time during the year	36 49 85		
Re-admitted during the year	... 11 6 17	47 55	102
	—————	—————	—————
Total under care during the year...	251	307	558
Discharged or Removed :—			
Recovered	... 23 19 42		
Relieved	... 5 3 8		
Not improved	... 1 1 2		
Died	... 20 13 33	49 36	85
	—————	—————	—————
Remaining in the Asylum 31st Dec., 1872, inclusive of 4 absent on trial	202	271	473

Comparing the above with the corresponding statement for last year it will be found that the proportion of male patients has very slightly decreased, a circumstance which seems to confirm the hope before expressed by your Committee, that it may be possible to escape the necessity of enlarging the side of the house assigned to that class.

THE MAINTENANCE ACCOUNT.

Your Committee regret to say that the weekly cost of maintenance, the charge for which has been gradually reduced from 8s. 9d. per head per week to 7s. 7d., has practically absorbed the balance in hand referred to in this part of the Report last year, and looking at the present state of the provision market, the advanced price of consumable articles of every kind, and the consequent necessity of granting, in many instances, higher wages, they are compelled to recommend a return to the former rate of payment, viz., 8s. 9d.

THE FIRST COST ACCOUNT.

The balance of £992 4s. 5d. at the expiration of the last year has been increased by receipts in excess of payments to the extent of £293 1s. 5d.

The existing balance, however, is only represented by the sum of £285 5s. 10d., the sum of £1000 having been

appropriated towards the payment off of the existing debt, in pursuance of a recommendation contained in last year's Report.

TREASURER.

The office of Treasurer of the Asylum having become vacant by the resignation of Mr. Alexander Meek, your Committee, after expressing in their minutes "their strong sense of the obligation the county and themselves personally were under to Mr. Meek for his very valuable services, dating from the first opening of the Asylum," have appointed Mr. Alexander Grant Meek to supply the vacancy, subject to his giving such security as is required by the rules of the Asylum to the Clerk of the Peace for the County, a condition which has since been complied with.

SUPPLY OF WATER.

Your Committee referred in their last Report to certain works that were being carried on, under the direction of the County Surveyor, for the purpose of remedying a deficiency in the supply of water to the Asylum; they are now glad to be able to state that the anticipations of that officer have been realised, and that from the completion of the works in January last, up to the present time, the water supply has been all that could be desired.

CONDITION AND MANAGEMENT OF THE ASYLUM.

The Commissioners in Lunacy in concluding the Report made by them upon their official visit to the Asylum in October last, have expressed their satisfaction with the creditable condition and management of the Asylum ; and in this favourable judgment of the Asylum and its management under Dr. Thurnam, the Medical Superintendent, and other Officers of the establishment, your Committee entirely concur.

The Reports of the Medical Superintendent and of the Chaplain, as well as the financial tables of the Steward, will be found appended to this Report, and the whole will be printed and in the hands of Magistrates a month before the April Sessions.

M. WILKINSON, D.D.,

Chairman.

TWENTY-SECOND
R E P O R T
OF THE
MEDICAL SUPERINTENDENT.

The Medical Superintendent herewith submits his Twenty-Second Report, as follows :—

Twenty-Second
Annual Report.

In the course of the year 1872, 102 cases have been admitted—a smaller number than during any one year for thirteen years past. Of the 102 cases, 17 were readmissions. During two preceding years more men than women have been admitted, but the experience of the past year accords with that usual in this Asylum—the numbers for the year consisting of 47 men and 55 women. The total number treated was 558, viz., 251 cases of men and 307 of women, being an increase of two only on last year's numbers, but shewing a reduction of 13 as compared with those of 1870.

The average numbers for the past and four previous years are shown in the following tabular enumeration :—

Average
Numbers.

AVERAGE NUMBERS.

		Males.		Females.		Total.
1868	—	176·4	...	258·6	...	435·
1869	—	185·6	..	258·8	...	444·4
1870	—	193·8	...	252·7	...	446·5
1871	—	199·	...	255·5	...	454·5
1872	—	193·9	...	263·5	...	457·4

It will be seen that there is a slight increase in the total average number, but a decrease of five in that of male patients.

Crowded state
of Wards.

There are at present 473 patients (202 males and 271 females) under care ; two of each sex are, however, absent on trial. This shows a considerable increase as compared with any previous year. There are 16 more than in 1869, the year in which the highest numbers have, up to the present time, been attained. This accumulation of patients is due to the less than average number of both discharges and deaths, especially the latter. Fortunately there is a slight diminution in the numbers (202 as against 204) in the Male Department ; and the wards on that side of the house are somewhat less crowded than a year ago. Any claim for the enlargement of the Asylum remains as before. In the Female Department there is still spare accommodation for from 20 to 25 additional patients.

Discharges
and
Recoveries.

The *recoveries*, numbering 42, are at about the average rate, as calculated on the admissions ; being

a more satisfactory result than might have been anticipated. Eight cases were discharged *relieved* ; and two, *not improved*, were transferred to the County Asylums for Gloucester and Devon respectively.

The very unpromising character as to the prospect of recovery in a large proportion of those admitted must again be referred to. The numbers labouring under paralysis and other obvious brain-disease is still very great, and shews a considerable increase. It is melancholy to reflect on the large number of these cases in particular, in which the exciting cause is clearly traceable to intemperance in drink. During the five years 1867-1871, 20 per cent. were, after inquiry as particular as could be instituted, manifestly attributable to habits of drunkenness. During the year now expired, as many as 35 of the 102 admissions, or 34 per cent., were to be assigned to this cause. It is to be feared that the increased wages, now in many places paid to the agricultural labourer, are of little real advantage to the recipients, but rather to the licensed keepers of public houses, who profit by the consequent larger expenditure in drink.

The general health has again been good. There has been no epidemic, except that diarrhoea prevailed for two or three weeks in the month of

Prospect of Recovery.

General Health.

Diarrhoea.

March. The disorder was confined to two of the Male wards ; no more than ten patients were affected by it, and no case proved fatal. A strict investigation was made into the state of drains and cesspools, but nothing to explain the unwonted outbreak was found.

Small-Pox. During the early summer, whilst the Militia were **Revaccination.** in training at Devizes, small-pox, for a second time within three years, prevailed in the town ; where about twenty persons were attacked and two died. Under these circumstances it was thought desirable to re-vaccinate all the younger servants and attendants who had not had small-pox ; and the like was done for all patients under 40 years of age. Altogether 115 persons, inclusive of Mr. Henry C. Ward, the Clerk and Steward, were vaccinated, of whom 90 were patients. Out of the whole number, the vaccination was more or less successful in 35 instances, i.e., in about 30 per cent. Before the process of vaccination was concluded, the epidemic in the town and neighbourhood had entirely subsided, and it was thought needless to extend the operation to the older patients.

**Deaths and
rate of
Mortality.** The *deaths* have been fewer than usual, 33 in number, viz., 20 men and 13 women. This gives an average rate of mortality of 7.2 per cent.—a lower rate than during any year since the opening of the Asylum, and much lower than for the 21.35

years, which averages 11·6 per cent. Eleven years ago, namely in 1862, a similar though not quite so low a mortality obtained, viz., 7·8 per cent.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1872	... 10·3	4·9	7·2
For 21·35 years - 1851-72*	14·5	9·5	11·6

More than one-fourth, namely 9 of those who died were persons of 70 years of age and upwards ; one was 80, and another 83 years of age ; the rest, between 70 and 80.

There is little unusual or that calls for comment Causes of
Death. in the causes of death, but two or three cases of pathological interest will be found recorded in Table 18. The only fatal cases referable to the zymotic class are one of dysentery and one of diarrhoea. Both, however, were sporadic, and occurred many months after the cessation of the epidemic of diarrhoea previously referred to. The case of dysentery was in an old woman of 77 ; that of diarrhoea in a man of 35 enfeebled by long continued paralytic dementia.

A Coroner's inquest was held on the body of Inquests. a male patient aged 72 ; he had long been suffering under symptoms of heart disease, and on the evening of April 27th, soon after 8 o'clock, he was

* Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1872.

found dead in bed, the attendant having visited him half-an-hour before, when he had taken his usual supper of beef tea and bread, carefully given with a small spoon. The verdict of the jury was "Found Dead from Natural Causes."

Birth of Child. A married woman, admitted in a state of pregnancy in June, was confined with a female child on October 27th. The patient who suffers, from symptoms of paralysis and is not likely to recover, remains in the Asylum. The child has been removed to the Union Workhouse at Malmesbury.

Escapes. Eight patients have escaped; one youth, an epileptic imbecile, on two occasions. Once he darted off from a walking party, and, a few months later, was seen to climb the airing court wall, with the aid of another patient. On both occasions he was at once followed on the road leading to his home in the extreme south of the county, and brought back from the neighbouring villages of Potterne and Market Lavington. Another patient, who had also climbed the wall, was recaptured at Devizes in half-an-hour. A third reached his abode at Westbury, but was brought back by the police in two days. An old man, aged 67, got home to Purton, where he was kept concealed for some days by a relative; being discovered by the police he was brought back suffering from sore feet.

in a severe form, brought on by the long walk of 25 miles, and has been confined to his bed for a couple of months in consequence. The escape of two men at dead of night from a first-floor dormitory, evinced great cunning and determination. One of them was a carpenter and employed as such in the Asylum. They removed a window sash from its frame, and by the aid of sheets lowered themselves to the ground, reaching their respective homes at and near Potterne, in one case to the great terror of wife and family. Both were brought back in the course of the next day, sullen but unharmed. Two women employed in the Laundry escaped therefrom together, walking to the suburbs of Devizes, where the Medical Superintendent, passing at the time, found them quietly talking at a cottage door. They were readily prevailed on to return to the Establishment in company with the Attendant, who had followed in pursuit.

No change has occurred in the staff of Officers, ^{Officers and} Attendants; whose duties ^{Attendants.} it is believed have in general been rightly performed. There has, however, been some unsettlement in the Male Department, in connexion with a claim preferred by many of the attendants for an increase of wages. This was considered by the Visiting Justices, and the scale of remuneration considerably advanced, though not to the extent some of their number expected.

Weekly Charge. It is no longer possible to maintain the same low charge for patients as that for the last two years, and the Committee of Visitors have decided on an augmentation at the rate of 2d. per diem, raising thus the weekly charge from 7s. 7d. to 8s. 9d.

Conclusion. The Medical Superintendent must again repeat his warm thanks to the Committee of Visitors for their continued assistance and support in the discharge of the duties of his office.

(Signed)

JOHN THURNAM, M.D.,

Medical Superintendent.

R E P O R T
OF THE
C H A P L A I N .

*To the Chairman and Visitors of the Wilts County
Lunatic Asylum.*

GENTLEMEN,

I beg to inform you that the services of the Chapel have been conducted with all possible regularity and punctuality.

I may again express my thankfulness that another year has passed, and not a single service either daily or on Sunday has been from illness or other cause omitted or interrupted. A few times during the year, I have been obliged to be absent upon business; on those occasions and for one service on Christmas Day, my place has been kindly and efficiently supplied by the Rev. Henry Richardson, a clergyman residing in Devizes and holding duty in the neighbourhood.

The Holy Communion has been administered as usual; and the music of the Chapel is conducted with order and propriety.

The number of deaths during the past year is thirty-three, being twenty males and thirteen females; of whom twenty-three have been interred in the Cemetery on the grounds. The remaining ten, being eight males and two females, were removed for burial to their own parishes or districts.

I remain, Gentlemen,

Yours very truly,

H. T. PURRIER, Chaplain.

15th January, 1873.

REPORT
OF THE
COMMISSIONERS IN LUNACY.

WILTS ASYLUM,

24th October, 1872.

In this County Asylum which we have to-day inspected there are on the books 474 patients, i.e., 202 men and 272 women, in other words an increase in number since our colleagues' visit in August last year of 4 in the male and 19 in the female division.

The vacant accommodation is estimated to be sufficient for 6 men and 25 women, or thereabouts.

Admission has not been refused in any case, but in several instances reception has been postponed, and suggestions have been made for interim treatment of the patients at their own homes or in workhouses. We cannot learn that the Committee entertain any idea of immediate enlargement of the building of the male side; it seems to us therefore expedient that early consideration should be given to the possibility of suitable arrangements between the Committee and Boards of Guardians for the care in Workhouse infirmaries of such chronic and harmless cases as Dr. Thurnam might himself select from the male patients on the books of this Asylum. If a dietary equal to that in use here and some paid supervision could be insured by such arrangements, there are many patients whom we saw who could thus, in our opinion, be properly cared for.

The changes which have taken place among the patients since this Asylum was visited by members of our Board may be stated as follows :

		MALES.	FEMALES	TOTAL.
Admissions	62	63 — 125
Discharges	31	24 — 55
{ Which include }			26	17 — 43
Recoveries				
Deaths	27	20 — 47

No patient has died from suicide or casualty, and there has been no inquest. According to the medical records the causes of death have been—

		MALES.	FEMALES.	TOTAL.
General paralysis	2	1 — 3
Other forms of brain disease, including ordinary paralysis and apoplexy	6	3 — 9
Epilepsy	.	..	3	2 — 5
Pulmonary consumption			4	5 — 9
Other forms of lung disease and heart disease	5	1 — 6
Diseases of the abdominal organs			4	6 — 10
Other ordinary causes	3	2 — 5
				—
		27	20	47

Thirteen patients of each sex have been the subjects of *post mortem* examination.

In the course of our inspection we have seen all the patients except 2 men and 1 woman who are away on leave of absence, and 1 man who escaped about a week ago and has not yet been retaken. The wet weather having detained them we found the patients in-doors and chiefly in their several wards. There was consequently somewhat more excitement in two of the wards occupied by the least favourable class than has been

observed on former occasions. There was, however, generally great order and tranquillity. The condition of both sexes in regard to dress and personal appearance was, on the whole, very satisfactory; there are still however too many special locked-dresses among the men, though we were glad to remark that no such unsightly clothing was in use on the female side. We think that as the winter comes on woollen gowns would be more comfortable and suitable for the women, some of whom complained to us that at that period their dress was not sufficiently warm.

As we passed through the rooms 2 men were in seclusion, but no one in either division was under restraint. Several patients were in bed from chronic disease. There is no special infirmary here for males or females, but in an asylum of this size we think that wards conveniently situated, such as Nos. 1 on the ground floor of each division, should be set apart for treatment of the sick and infirm.

The numbers on the Register as having been under medical treatment during the past week are 15 men and 16 women, making a total of 31 patients so treated.

Since our colleagues' visit, about fifteen months ago, there has been one instance of restraint, that of a man who wore locked gloves 3 weeks for surgical reasons. During the same interval 23 men and 29 women have been secluded, the former upon 148 and the latter upon 38 occasions. Among the men 2 patients were secluded respectively upon 87 and 31 of the occasions referred to.

The conduct of the patients whom we saw at dinner to-day was quiet and orderly; the meal consisted of bacon, potatoes, cabbage, bread, and beer, all of which were of good quality and properly served.

We found all the day rooms, dormitories, beds and bedding clean, and the rooms were well ventilated and in good order ; the gas brackets in the single rooms remarked upon as unsafe have been removed. The means of personal washing in some wards appear to be insufficient, and the wash-stands in the dormitories are apparently but rarely used. There is a good supply of combs, but we did not see any brushes available for the patients. The supply of water has been improved since last visit, and fewer patients are now bathed in the same water. We trust that ultimately it may be found practicable to give to each patient a clean bath. The straw beds have been somewhat reduced in number, but there are still as many as 26 on the male, and 32 on the female side. The cement flooring in the four single rooms in Nos. 4 Ward in each division is objectionable, and should be replaced by wood. The suggestion of our colleagues as to the internal improvement of the refractory wards has not yet received that attention which we trust will be accorded to it.

The staff of attendants is still upon a lower scale than in most County Asylums, and is in our opinion inadequate as regards the refractory wards for the safe care at all times of this class. No. 4 wards on each side have 11 patients, of violent propensities, in charge of one attendant only, who could moreover not obtain assistance upon an emergency, without going into another ward to ask for help, the patients during the interval being left alone.

The patients attending Divine Service are reported to be, on Sundays, 80 men and 122 women. We regret that the number is so small, and we observe that the chapel will contain a considerably larger number. The numbers employed are said to be 107 on the male side, and 146 in the female division

We think that efforts should be made to teach tailoring and shoemaking to some of the younger and more capable patients. There is at present but 1 patient in the tailors', and 3 in the shoemakers' shop, but there were 2 paid men in each. The shop first mentioned has not been enlarged, and is quite too small for such an Asylum as this is. The arrangements for out-door exercise and in-door recreation are as previously reported. The associated entertainments might with advantage be given more frequently than once a month, and the number of patients taken regularly for exercise beyond their airing courts should be largely increased.

Subject to the above remarks we have to record our opinion that the condition and management of the Asylum is creditable to the Committee of Visitors and Superintendent.

CHARLES PALMER PHILLIPS } Commissioners
JOHN D. CLEATON, } in Lunacy.

* The proportion of recoveries for the entire period is here calculated on the admissions during 20 years only: viz., 2330. The 167 admitted in 1851

were patients whose cases, like many of those in the succeeding year, were of long duration and offered little or no prospect of recovery.

TABLE 4.—SHEWING THE HISTORY OF THE ANNUAL ADMISSIONS SINCE THE OPENING OF THE ASYLUM; WITH THE DISCHARGES, AND DEATHS; AND THE NUMBERS OF EACH YEAR REMAINING ON THE 31ST DECEMBER, 1872.

TABLE 5.—SHEWING THE LENGTH OF TIME AFTER DISCHARGE, AT THE TIME OF RE-ADMISSION, 1872.

LENGTH OF TIME AFTER DISCHARGE.	Had been Discharged Recovered.			Had been Dis- charged not Recovered
